A five-digit number, made up of a unique 4-digit numerical dealer number and a single digit 5th numerical digit that denotes department type

The dealer provided authorisation key. The key can be found by dealer principals inside Dealernet in the dealership tab.

This is the Repair Order (RO), Job Card or invoice number- used by the DMS to uniquely identify the transaction and work. Size and format does not matter.

This the unit Frame number or Vehicle Identification Number (VIN) that uniquely identifies the unit, most commonly it is a 17 digit alpha/numeric value but may be shorter including other characters like "-"
